The New Arctic 17

We have 30 years of experience with products which provide the elderly and disabled with independence, safety and quality of life, and we have used this experience to design our new Arctic 17 chair. However, we are not afraid to innovate and develop, and we never stop working to improve our products. By working closely with therapists and users, we have raised our tried-and-tested Arctic 17 to a new level.

In the new Arctic 17, we have developed a new seat cushion which has two layers of foam to provide better pressure relief and even more seating comfort. The riser recliner chair is suitable for anyone who needs help getting out of a chair, which is why we have now improved the chair's flexibility by making it available in more widths. We have also provided more adjustment options and a wide range of accessories. This means that we can be sure that this chair will meet your needs, even if they change over time. The riser recliner chair is easily adjustable and can be converted from vertical lift to tilt lift. This applies to all models except the Arctic 17/60.

We want you to be independent at home, which is why it is important for our products to be uncomplicated and user-friendly. That is why we have simplified the controls of the new Arctic 17, with contrasting colours, pictograms and text which makes the chair's functions highly visible and easy to understand.

Safety is one of the most important things we can offer you as a user of our products. That is why we have improved our lifting mechanism to make the chair even more robust, stable and safe.

A safe lift will help you get up out of the chair and get on with your life. We consider participation to be one of the most important factors in enjoying a good quality of life, but we also know that well-being and comfort are vital. With the latest foam technology, you can sit down with a nice cup of coffee or a book and enjoy the comfort provided by a foam which gives excellent pressure relief and support for long periods. For even more comfort, we recommend the reclining model, which not only reclines safely back into the resting position, but also all the way back into a lying position.

With a USB charger in the chair, you can have your phone, tablet or another welfare technology device, easily accessible, even while they are charging.

The Arctic chair has a modern yet timeless appearance to look good in any home. The chair has clean lines and shaded fabric which will look new, even after many years of use. We have used fabric, leather and oak in the design, familiar to all of us from the furniture and interior design market, which means that the chair will become a natural part of your room.

FUGLER I NORGE

New Arctic 17

– Riser recliner chair for every need

The top part of the backrest can easily be angled

Height-adjustable backrest

Adjustable seat width

Drop-down armrests make it easy to get in and out of the chair sideways

The hand control is labelled with pictograms in contrasting colours to make it easy to use

The swivel release is just in front of the armrest. Easy to operate

Castors mean that the chair can easily be moved when you need to clean

Excellent neck cushion. Soft and supportive

The seat and neck cushions have covers which can easily be taken off and washed

USB port for charging phones, tablets etc. is integrated in the left armrest

The chair lifts at a comfortable angle which makes it easy for you to stand up

Very comfortable to sit in. Seat cushion in innovative double layer of foam to provide better pressure relief and even more comfort

Fabric between footrest and seat ushion minimises the risk of pinching

The Arctic 17/60 comes with an extra baseplate to increase stability

All models (except 17/60) can be easily converted from slant to straight lift.

Arctic 17 Assortment

The **Standard**-models have individual backrest and footrest controls. These chairs come with hand controls with contrasting colours to make operating the various functions easy.

Suitable for anyone who needs a riser recliner chair.

User controls backrest/lift and foot rests independently of each other with 4 buttons.

The fully **Reclining (Tilt)**-models are our most advanced models. These chairs can be reclined all the way back into a fully reclined position for optimum relief

All our Tilt models can be tilted back in shock position..

Suitable for anyone who spends large parts of the day in the chair and need variations in positional relief to avoid pressure ulcers.

User controls backrest / lift, foot rests and tilt independently with 6 buttons. Automatic lifting by pressing the upper left button.

NEW SYNCHRON FUNCTION Foot cushion and back move synchronously so that the hip is stressed as little as possible when changing posture. Easily relieve your legs while watching TV or reading.

The **Synchron**-models have interconnected electrical function of the back and foot cushion. The chairs come with very simple hand control with just two buttons. Suitable for those who need the simplest operation of the chair's functions.

Suitable especially for cognitively weak users.

The footboard lifts (tilt) 23.4 degrees. Back is at rest.

Back is tilted back (tilt) 58.4 degrees. This opens the hip angle. Footboard retains the position.

Footboard lifts to maximum score. The back is at rest.

Back continues backwards. Now you can achieve maximum resting position.

Further customization of your Arctic 17

Neck problems	• Adjust the angle of the upper backrest to the desired position. • Choose a neck cushion in the right size and firmness. See the examples in the accessories section
Balance problems and need to be held in position in the chair	• Velg et av våre ryggtrekk for ekstra god støtte. For eksempel Ryggtrekk med ekstra god sidestøtte
Need for extra back adjustment, e.g. for kyphosis, scoliosis and other postural conditions	• Try our comfort backrest cover, with a fibre filling that can be shaped around the user's needs
Reduced function in fingers and/or hands	• Use joystick control instead of handset
Need for extra-soft seat comfort	• Use extra-soft seat cushion or supersoft cover • Use comfort backrest cover
Need for extra lower back support	• Use inflatable lumbar support. The cushion is available in two different sizes. • If necessary use small lumbar cushion or large lumbar cushion which can be fastened to exactly the right place on the backrest
Incontinence problems	• Use Incontinence cover for seat, back, seat / back and possibly Incontinence foot cover.
Risk of pressure sores	• Use seat cushion with pressure relief, gel seat cushion, supersoft cover or flat seat with special cushions
Need for extra leg support	• Use scissor mechanism lift extension set. This extends the footrest out by 13 cm
Need to operate chair from the left	• The swivel lever and handset holder can be moved to the left side when you order the chair
Risk of falling out of the chair	• Use belt restraint and/or hip belt
Need to move the chair without getting out	• Use castor chassis with central braking

Accessories Neck cushions

Adriana neck cushion
Leather

Art. No.
29471
Description

Large, double-chamber neck cushion filled with beanbag pellets. Extremely soft, good-quality neck cushion which provides good support. You can adjust the firmness and support by adding or removing beanbag pellets. Beanbag pellets give off heat for tight muscles.
Hight: 19 cm, Width: 35 cm, Depth: 9 cm.

Description
The adapter pushes the back further in all positions. The back is pushed an average of 5 degrees forward.

HEPRO

Carekørp

Activity • Safety • Mastery

HEPRO AS is a modern and forward-looking competence company that develops, manufactures and sells high-quality aids and welfare technology and honest design. Our head office is located at Rognan in Norway, surrounded by mountains and mighty nature.

The company was established in 1987 and has long experience in developing products and solutions that make everyday life easier for our customers. Our vision is to give our customers the opportunity to take care of themselves, participate actively in their daily lives and live longer at home. Through high quality, fast response time and short communication path, Hepro should be the natural first choice for our customers.

In close collaboration with occupational therapists, we develop products and solutions tailored to our clients' needs for mobility, balance, comfort and hygiene. The goal is to provide security, mastery and increased activity through functional and user-oriented products. We engage with the individual user and go to great lengths to deliver products tailored to your individual needs.
